

## Padding work

1 Login or signup pages are missing

2 Aligning Navigation in Admin. Look and Feel.

3 In the linked page, you have to take the Full design admin panel, in which you will see a mobile, what we want here.

4 In the page with the link you will see a button where there is a screen showing explore more but there miss you have to make a screen like this

5 Link pages should be mobile responsive as well as dynamic so that any user can add the link and be visible in mobile view.

6 Appearance page should also be mobile response and aligned,

7 As soon as you click on a circular link [ it will open a map that is to show store wise
